ometimes reality lives up to the legend. While Paris remains the most universally shared travel dream for couples, what could be more charming than to have your own private apartment rental for an extended stay in the city?

It's like living a dream in central Paris...

This chic and intimate luxury accommodation, located in a splendid Haussmann-style cut-stone building, is the ideal setting for a discreet and romantic getaway for two. Even the housekeeper will manage to make herself invisible when serving the morning's personalized breakfast.

This 1-bedroom apartment features the spacious dimensions typical of late 19th century Parisian architecture. Some details have in fact remained unaltered since that era! From the room's wide windows, guests can indeed enjoy the smooth comings and goings of the black waistcoated, white-aproned waiters on the Avenue d'Eylau terrace, carrying their trays in the time-honored way. That's Paris! By contrast, the interior design has opted for a pure, contemporary approach, with a stylized four-poster bed, designer settees and understated furniture. On the living room side, the lush foliage on the Avenue Georges Mandel provides a pleasant green curtain, and if you lean forward a bit you can even give a neighborly wave to the Eiffel Tower!

Enjoying behind-the-scenes access to key historical and cultural sites. Organizing exclusive receptions. Spending time as a family or among friends...
